

Zone 5 outer

Section 29: Enfield Town to Southbury

Distance: 2.24 mi, 3.58 km

Introduction

This section is short and dull. It is mainly suburban but with an industrial section towards the end.

There are some places to eat at the end.

Directions

Turn sharp left out of Enfield Town station.

When the road bends right, bear left along a footpath by a plaque commemorating a cinema.

Keep straight ahead across an intersection, then along Camberley Avenue, then through a housing estate.

Turn left along Lincoln Road.

Take the footpath on the right before the level crossing.

After a short stretch along a residential road, take another footpath on the left.

Cross the railway line, then immediately bear right.

Pass First and Second Avenues on the right, then turn right along (you guessed it) Third Avenue.

At the right bend, take the footpath on the left.

Carry on along Leighton Road.

After a left bend, turn right along Ayley Croft.

Cross the A10, and carry on along Progress Way into an industrial estate.

At the end of the road, turn left past a barrier.

Follow the marked footway across the industrial estate to the far side.

At the end, turn right along Lincoln Road.

After the railway, turn left along Kingsway.

At the end, turn left to reach Southbury station on the left.
